Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Ask the FCC to Support the FAIR SHARE PLAN

The Federal Communications Commission (FCC) may change the way fees are collected for your wireless and landline phones. For many of you, this means your telephone bill may increase.

This FCC tax hike will hurt those least able to afford it -- seniors, students, minorities, farmers, and small business owners. It is UNFAIR, but it's also something YOU CAN CHANGE. Make sure the FCC HEARS YOUR VOICE. Use this web page to file an official comment with the FCC. Please add your own comments or send it ?as is.?
